Attention: Mr. Dennis Leung

Dear Sir,

Re: Contract No. CV/2007/03 (Environmental Permit No. EP -140/2002)
Development at Anderson Road
Site Formation and Associated Infrastructure Works
Monthly EM&A Report for May 2016

Reference is made to the Environmental Team's submission of the draft Monthly EM&A Report for May 2016 received by e-mail on 7 June 2016 for our review and comment.

Please be informed that we have no adverse comment on the captioned submission. We write to verify the captioned submission in accordance with Condition 3.3 of the Environmental Permit No. EP-140/2002.

Thank you very much for your attention and please feel free to contact the undersigned should you require further information.

Yours faithfully,

David Yeung

EXECUTIVE SUMMARY

The Project "Development at Anderson Road – Site Formation and Associated Infrastructure Works" (hereafter called "the Project") is proposed to form platforms for housing development and associated uses in area of about 20 hectares, and to carry out necessary infrastructural upgrading or improvement works to cater for the proposed development.

China State Construction Engineering (Hong Kong) Limited (CSCE) was commissioned as the Contractor of the Project. AECOM Asia Co. Ltd. (AECOM) was employed by CSCE as the Environmental Team (ET) to undertake the Environmental Monitoring and Audit (EM&A) works for the Project.

The impact EM&A for the Project includes air quality and noise monitoring. The EM&A programme for Sau Ming Primary School (ID 4) and Sau Mau Ping Catholic Primary School (ID 5) commenced on 1 May 2008, while for Kwun Tong Government Secondary School (ID 1A), On Yat House (ID 2) and Sau Nga House (ID 3) commenced on 1 June 2008.

The monitoring stations ID 4 & ID 5 will serve both the entire Development of Anderson Road (Schedule 3 Designated Project (DP)) project as well as the Widening of Po Lam Road (Schedule 2 DP) project.

The construction for the Widening of Po Lam Road (Schedule 2 DP) project was commenced on 21 September 2011.

This report documents the findings of EM&A works for ID 1A, ID 2, ID 3, ID 4 and ID 5 conducted in the period between 1 and 31 May 2016. As informed by the Contractor, construction activities in the reporting period were:

- Slope stabilization and upgrading works at Portion C and E
- Earthwork and C&D stockpile at Portion A and C
- Temporary traffic arrangement and road work at J/O Po Lam Road, J/O Sau Mau Ping Road and J/O Lee On Road
- Toe / Berm planter and platform drainage construction on slope
- Trench excavation and drainage works at public road
- Installation of permanent railings at main site and slope berm
- Brick laying at footpath at L2 road
- Stormwater tank and main site drainage clearing and remedial works
- Installation of watermain downpipe at Po Lam Road CP2, Lee On Road Sewer A and Sau Mau Ping Road Sewer B
- Demolition of site hoarding
- E & M works at footbridges
- Lift installation works at footbridges
- Cement decoration works at footbridges and road L1 subway
- Installation glazing works at footbridge A
- Installation of metal canopy of bus stop station and subway
- Erection of Planter at Footbridges

Breaches of Action and Limit Levels for Air Quality

All 1-hour TSP and 24-hour TSP results were below the Action and Limit Levels in the reporting month.

Breaches of Action and Limit Levels for Noise

According to the information provided by the Contractor, no Action Level exceedance was recorded since no noise related complaint was received in the reporting month.

No exceedance of Limit Level of noise was recorded in the reporting month.

Complaint, Notification of Summons and Successful Prosecution

According to the information provided by the Contractor, no environmental complaint and no notification of summons and successful prosecution were received in the reporting month.

Reporting Changes

There was no reporting change in the reporting month.

Future Key Issues

Key issues to be considered in the coming month included:-

- Properly store and label oil drums and chemical containers placed on site:
- Proper chemicals, chemical wastes and wastes management;
- Maintenance works should be carried out within roofed, paved areas with proper drainage system
 to handle run-off from maintenance works;
- Collection and segregation of construction waste and general refuse should be carried out properly and regularly;
- Site runoff should be properly collected and treated prior to discharge:
- Regular review and maintenance of drainage systems and desilting facilities;
- Exposed slopes/soil stockpiles should be properly treated to avoid generation of silty surface runoff during rainstorm;
- Proper mitigation measures should be provided to avoid relocation of treated contaminated soil;
- Regular review and maintenance of wheel washing facilities provided at all site entrances/exits;
- Suppress dust generated from work processes with use of bagged cements, earth movements, drilling works, breaking works, excavation activities, exposed areas/slopes/soil stockpiles and haul road traffic:
- Conduct regular inspection of the working machineries within works area to avoid any dark smoke emission and oil leakage;
- Quieter powered mechanical equipment should be used:
- Provision of proper and effective noise control measures, such as erection of movable noise barriers during blasting, breaking and drilling works and at crushing plant works area and provision of acoustic material wrapping to breaking tips of breakers; and
- Proper protection and regular inspection of existing trees, transplanted/retained trees.

1 INTRODUCTION

1.1 Background

- 1.1.1 The Project site is located in the East Kowloon District. It is bounded by Anderson Road to the north, the realigned Sau Mau Ping Road to the south, Po Lam Road to the east, and Lee On Road and Shun On Road to the west.
- 1.1.2 The objective of the Project "Development at Anderson Road Site Formation and Associated Infrastructure Works" under Contract CV/2007/03 (hereafter called "the Project") is to provide land for constructing public housing and government and public facilities. The development will provide 16,100 public housing units for 48,000 people in phases between 2015 and 2016.
- 1.1.3 The scope of works of this Project includes construction of site formation, roads, drains and upgrading of existing infrastructure to provide usable land of about 20 hectares for housing and associated government, institution or community uses at the site between existing Anderson Road Quarry and Sau Mau Ping Road in Kwun Tong District.
- 1.1.4 The Project is anticipated to complete in the fourth quarter of 2015.
- 1.1.5 Part of the Project involving widening of existing Po Lam Road is a designated project and is governed by an Environmental Permit (EP) EP-140/2002, while the rest of the Project is non-designated. Baseline monitoring covering the entire Project site was undertaken and baseline monitoring report was prepared prior to commencement of construction of the Project in accordance with Conditions 3.2 and 3.4 of the EP (EP-140/2002) and the Environmental Monitoring and Audit (EM&A) Manual. The construction for the Widening of Po Lam Road was commenced on 21 September 2011.
- 1.1.6 According to the EP and the EM&A Manual of the Project, there is a need of an EM&A programme including air quality and noise monitoring.
- 1.1.7 The EM&A programme for Sau Ming Primary School (ID 4) and Sau Mau Ping Catholic Primary School (ID 5) commenced on 1 May 2008, while for Kwun Tong Government Secondary School (ID 1A), On Yat House (ID 2) and Sau Nga House (ID 3) commenced on 1 June 2008.
- 1.1.8 The monitoring stations ID 4 & ID 5 will serve both the entire Development of Anderson Road (Schedule 3 Designated Project (DP)) project as well as the Widening of Po Lam Road. (Schedule 2 DP) project.
- 1.1.9 AECOM Asia Co. Ltd. (AECOM) was employed by the Contractor, China State Construction Engineering (Hong Kong) Limited (CSCE), as the Environmental Team (ET) to undertake the EM&A works for the Project. In accordance with the EM&A Manual of the Project, environmental monitoring of air quality, noise and environmental site inspections would be required for this Project.

1.2 Scope of Report

1.2.1 This is the ninety-seventh monthly EM&A Report under the Contract CV/2007/03 - Development at Anderson Road – Site Formation and Associated Infrastructure Works. This report presents a summary of the environmental monitoring and audit works, list of activities and mitigation measures proposed by the ET for the Project in May 2016 for ID 1A, ID 2, ID 3, ID 4 and ID 5.

1.3 Project Organization

1.3.1 The project organization structure is shown in Appendix A. The key personnel contact names and numbers are summarized in Table 1.1.

Table 1.1 Contact Information of Key Personnel

| Party | Position | Name | Telephone | Fax |
|-----------------------|---|----------------|-----------|-----------|
| | Chief Resident Engineer | Dennis Leung | 3656 3000 | 3656 3100 |
| ER (Ove Arup) | Senior Resident Engineer | Michael Wright | 3656 3000 | 3656 3100 |
| Lik (Ove / liap) | Assistant Resident Engineer (Civil) | Heidi Fung | 2407 0300 | 3656 3100 |
| IEC (Ramboll Environ) | Independent Environmental Checker | David Yeung | 3465 2888 | 3465 2899 |
| Contractor | Site Agent | Holmes Wong | 2704 2095 | 2702 6553 |
| (CSCE) | Environmental Officer | Thomas Cheung | 2704 2095 | 2702 6553 |
| ET (AECOM) | ET Leader | Yiu Wah Fung | 3922 9366 | 2317 7609 |

1.4 Summary of Construction Works

- 1.4.1 As informed by the Contractor, the Contactor has carried out the following major activities in the reporting month:-
 - Slope stabilization and upgrading works at Portion C and E
 - Earthwork and C&D stockpile at Portion A and C
 - Temporary traffic arrangement and road work at J/O Po Lam Road, J/O Sau Mau Ping Road and J/O Lee On Road
 - Toe / Berm planter and platform drainage construction on slope
 - Trench excavation and drainage works at public road
 - Installation of permanent railings at main site and slope berm
 - Brick laying at footpath at L2 road
 - Stormwater tank and main site drainage clearing and remedial works
 - Installation of watermain downpipe at Po Lam Road CP2, Lee On Road Sewer A and Sau Mau Ping Road Sewer B
 - Demolition of site hoarding
 - E & M works at footbridges
 - Lift installation works at footbridges
 - Cement decoration works at footbridges and road L1 subway
 - Installation glazing works at footbridge A
 - Installation of metal canopy of bus stop station and subway
 - Erection of Planter at Footbridges
- 1.4.2 The general layout plan of the Project site showing the contract area is shown in Figure 1.1.
- 1.4.3 The environmental mitigation measures implementation schedule are presented in Appendix B.

1.5 Summary of EM&A Programme Requirements

- 1.5.1 The EM&A programme required environmental monitoring for air quality, noise and environmental site inspections for air quality, noise, water quality, chemical and waste management. The EM&A requirements for each parameter described in the following sections include:-
 - All monitoring parameters;
 - Monitoring schedules for the reporting month and forthcoming months;
 - Action and Limit levels for all environmental parameters;
 - Event / Action Plan;
 - Environmental mitigation measures, as recommended in the Project EIA study final report; and
 - Environmental requirement in contract documents.

2 AIR QUALITY MONITORING

2.1 Monitoring Requirements

2.1.1 In accordance with the EM&A Manual, 1-hour and 24-hour TSP levels at 5 air quality monitoring stations were established. Impact 1-hour TSP monitoring was conducted for at least three times every 6 days, while impact 24-hour TSP monitoring was carried out for at least once every 6 days. The Action and Limit level of the air quality monitoring is provided in Appendix C.

2.2 Monitoring Equipment

2.2.1 24-hour TSP air quality monitoring was performed using High Volume Sampler (HVS) located at each designated monitoring station. The HVS meets all the requirements of the EM&A Manual. Portable direct reading dust meters were used to carry out the 1-hour TSP monitoring. Brand and model of the equipment is given in Table 2.1.

Table 2.1 Air Quality Monitoring Equipment

| Equipment | Brand and Model |
|---|--|
| Portable direct reading dust meter (1-hour TSP) | Sibata Digital Dust Monitor (Model No. LD-3 and LD-3B) |
| High Volume Sampler (24-hour TSP) | Tisch Total Suspended Particulate Mass Flow Controlled High Volume Air Sampler (Model No. TE- 5170 & GMW-2310) |

2.3 Monitoring Locations

2.3.1 Monitoring stations, ID 2, ID 3, ID 4 and ID 5, were set up at the proposed locations in accordance with EM&A Manual, while monitoring station, ID 1A, was set up at a location agreed by the ER and IEC. Figure 2.1 shows the locations of the monitoring stations. Table 2.2 describes the details of the monitoring stations.

Table 2.2 Locations of Air Quality Monitoring Stations

| ID | Location | Monitoring Station |
|----|--|---|
| 1A | Kwun Tong Government Secondary School | Roof top of the premises facing Anderson Road |
| 2 | On Yat House | Roof top of the premises facing Lee On Road |
| 3 | Sau Nga House | Roof top of the premises facing Sau Mau Ping Road |
| 4 | Sau Ming Primary School | Roof top of the premises |
| 5 | Sau Mau Ping Catholic Primary School | Roof top of the premises |

Monthly EM&A Report for May 2016

2.4 Monitoring Parameters, Frequency and Duration

2.4.1 Table 2.3 summarizes the monitoring parameters, frequency and duration of impact TSP monitoring.

Table 2.3 Air Quality Monitoring Parameters, Frequency and Duration

| Monitoring Station | Parameter | Frequency and Duration |
|------------------------------|-------------|-------------------------------|
| ID 1A, ID 2, ID 3, ID 4 & | 1-hour TSP | At least 3 times every 6 days |
| ID5 | 24-hour TSP | At least once every 6 days |

2.5 Monitoring Methodology

2.5.1 24-hour TSP Monitoring

- (a) The HVS was installed in the vicinity of the air sensitive receivers. The following criteria were considered in the installation of the HVS:-
 - (i) A horizontal platform with appropriate support to secure the sampler against gusty wind was provided.
 - (ii) The distance between the HVS and any obstacles, such as buildings, was at least twice the height that the obstacle protrudes above the HVS.
 - (iii) A minimum of 2 meters separation from walls, parapets and penthouse for rooftop sampler.
 - (iv) A minimum of 2 meters separation from any supporting structure, measured horizontally is required.
 - (v) No furnace or incinerator flues nearby.
 - (vi) Airflow around the sampler was unrestricted.
 - (vii) Permission was obtained to set up the samplers and access to the monitoring stations.
 - (viii) A secured supply of electricity was obtained to operate the samplers.
 - (ix) The sampler was located more than 20 meters from any dripline.
 - (x) Any wire fence and gate, required to protect the sampler, did not obstruct the monitoring process.
 - (xi) Flow control accuracy was kept within ±2.5% deviation over 24-hour sampling period.

(b) Preparation of Filter Papers

- Glass fibre filters, G810 were labelled and sufficient filters that were clean and without pinholes were selected.
- (ii) All filters were equilibrated in the conditioning environment for 24 hours before weighing. The conditioning environment temperature was around 25 °C and not variable by more than ±3 °C; the relative humidity (RH) was < 50% and not variable by more than ±5%. A convenient working RH was 40%.
- (iii) All filter papers were prepared and analysed by ALS Technichem (HK) Pty Ltd., which is a HOKLAS accredited laboratory and has comprehensive quality assurance and quality control programmes.

(c) Field Monitoring

- (i) The power supply was checked to ensure the HVS works properly.
- (ii) The filter holder and the area surrounding the filter were cleaned.
- (iii) The filter holder was removed by loosening the four bolts and a new filter, with stamped number upward, on a supporting screen was aligned carefully.
- (iv) The filter was properly aligned on the screen so that the gasket formed an airtight seal on the outer edges of the filter.
- (v) The swing bolts were fastened to hold the filter holder down to the frame. The pressure applied was sufficient to avoid air leakage at the edges.
- (vi) Then the shelter lid was closed and was secured with the aluminium strip.
- (vii) The HVS was warmed-up for about 5 minutes to establish run-temperature conditions.
- (viii) A new flow rate record sheet was set into the flow recorder.
- (ix) On site temperature and atmospheric pressure readings were taken and the flow rate of the HVS was checked and adjusted at around 1.3 m³/min, and complied with the range specified in the EM&A Manual (i.e. 0.6-1.7 m³/min).
- (x) The programmable digital timer was set for a sampling period of 24 hrs, and the starting time, weather condition and the filter number were recorded.
- (xi) The initial elapsed time was recorded.
- (xii) At the end of sampling, on site temperature and atmospheric pressure readings were taken and the final flow rate of the HVS was checked and recorded.
- (xiii) The final elapsed time was recorded.
- (xiv) The sampled filter was removed carefully and folded in half length so that only surfaces with collected particulate matter were in contact.
- (xv) It was then placed in a clean plastic envelope and sealed.
- (xvi) All monitoring information was recorded on a standard data sheet.
- (xvii) Filters were then sent to ALS Technichem (HK) Pty Ltd. for analysis.

(d) Maintenance and Calibration

- (i) The HVS and its accessories were maintained in good working condition, such as replacing motor brushes routinely and checking electrical wiring to ensure a continuous power supply.
- (ii) HVSs were calibrated using TE-5025A Calibration Kit upon installation and thereafter at bi-monthly intervals.
- (iii) Calibration certificate of the TE-5025A Calibration Kit and the HVSs are provided in Appendix D.

2.5.2 1-hour TSP Monitoring

(a) Measuring Procedures

The measuring procedures of the 1-hour dust meter were in accordance with the Manufacturer's Instruction Manual as follows:-

- (i) Turn the power on.
- (ii) Close the air collecting opening cover.
- (iii) Push the "TIME SETTING" switch to [BG].
- (iv) Push "START/STOP" switch to perform background measurement for 6 seconds.
- (v) Turn the knob at SENSI ADJ position to insert the light scattering plate.
- (vi) Leave the equipment for 1 minute upon "SPAN CHECK" is indicated in the display.
- (vii) Push "START/STOP" switch to perform automatic sensitivity adjustment. This measurement takes 1 minute.
- (viii) Pull out the knob and return it to MEASURE position.
- (ix) Push the "TIME SETTING" switch the time set in the display to 3 hours.
- (x) Lower down the air collection opening cover.
- (xi) Push "START/STOP" switch to start measurement.

(b) Maintenance and Calibration

(i) The 1-hour TSP meter was calibrated at 1-year intervals against a continuous particulate TEOM Monitor, Series 1400ab. Calibration certificates of the Laser Dust Monitors are provided in Appendix D.

2.6 Monitoring Schedule for the Reporting Month

2.6.1 The schedule for environmental monitoring in May 2016 is provided in Appendix E.

2.7 Monitoring Results

2.7.1 The monitoring results for 1-hour TSP and 24-hour TSP are summarized in Tables 2.4 and 2.5 respectively. Detailed air quality monitoring results are presented in Appendix F.

Table 2.4 Summary of 1-hour TSP Monitoring Results in the Reporting Period

| | Average (μg/m³) | Range (μg/m³) | Action Level (μg/m³) | Limit Level (μg/m³) |
|-------|-----------------|---------------|-------------------------|------------------------|
| ID 1A | 74.9 | 68.2 - 80.2 | 201.5 | 500 |
| ID 2 | 75.4 | 70.8 - 81.1 | 197.0 | 500 |
| ID 3 | 75.6 | 68.8 - 81.4 | 203.7 | 500 |
| ID 4 | 75.6 | 70.0 - 79.0 | 264.6 | 500 |
| ID 5 | 75.2 | 70.6 - 80.1 | 267.4 | 500 |

Table 2.5 Summary of 24-hour TSP Monitoring Results in the Reporting Period

| | Average (μg/m³) | Range (μg/m³) | Action Level (μg/m³) | Limit Level (μg/m³) |
|-------|-----------------|---------------|-------------------------|------------------------|
| ID 1A | 28.4 | 14.4 - 45.8 | 170.2 | 260 |
| ID 2 | 32.4 | 18.4 - 51.7 | 200.0 | 260 |
| ID 3 | 45.6 | 15.5 - 68.6 | 200.0 | 260 |
| ID 4 | 43.2 | 24.4 - 64.9 | 181.3 | 260 |
| ID 5 | 29.6 | 8.8 - 47.6 | 180.8 | 260 |

- 2.7.2 All 1-hour TSP and 24-hour TSP results were below the Action and Limit Levels in the reporting month
- 2.7.3 The event action plan is annexed in Appendix I.
- 2.7.4 Major dust sources during the dust monitoring included construction dust from the Project site, construction dust from other construction sites nearby and nearby traffic emission.
- 2.7.5 Weather information including wind speed and wind direction is annexed in Appendix H. The information was obtained from Hong Kong Observatory Tseung Kwan O Automatic Weather Station and Anemometer Station.

3 NOISE MONITORING

3.1 Monitoring Requirements

3.1.1 In accordance with the EM&A Manual, impact noise levels should be obtained at 5 noise monitoring stations. Impact noise monitoring was conducted for at least once per week during the construction phase of the Project. The Action and Limit level of the noise monitoring is provided in Appendix C.

3.2 Monitoring Equipment

3.2.1 Noise monitoring was performed using sound level meter at each designated monitoring station. The sound level meters deployed comply with the International Electrotechnical Commission Publications (IEC) 651:1979 (Type 1) and 804:1985 (Type 1) specifications. Acoustic calibrator was deployed to check the sound level meters at a known sound pressure level. Brand and model of the equipment is given in Table 3.1.

Table 3.1 Noise Monitoring Equipment

| Equipment | Brand and Model |
|------------------------------|------------------------------------|
| Integrated Sound Level Meter | B&K (Model No. 2238, 2250L & 2270) |
| Acoustic Calibrator | Rion (Model No. NC-73) |

3.3 Monitoring Locations

3.3.1 Monitoring stations, ID 2, ID3, ID 4 and ID 5, were set up at the proposed locations in accordance with EM&A Manual, while monitoring station, ID 1A, was set up at a location agreed by the ER and IEC. Figure 2.1 shows the locations of the monitoring stations. Table 3.2 describes the details of the monitoring stations.

Table 3.2 Locations of Impact Noise Monitoring Stations

| ID | Location | Monitoring Station |
|----|--|--|
| 1A | Kwun Tong Government Secondary School | 1m from the exterior of the roof top façade of the premises facing Anderson Road |
| 2 | On Yat House | 1m from the exterior of the roof top façade of the premises facing Lee On Road |
| 3 | Sau Nga House | 1m from the exterior of the roof top façade of the premises facing Sau Mau Ping Road |
| 4 | Sau Ming Primary School | 1m from the exterior of the roof top façade of the premises facing Sau Mau Ping Road |
| 5 | Sau Mau Ping Catholic Primary School | 1m from the exterior of the roof top façade of the premises facing Po Lam Road |

3.4 Monitoring Parameters, Frequency and Duration

3.4.1 Table 3.3 summarizes the monitoring parameters, frequency and duration of impact noise monitoring.

Table 3.3 Noise Monitoring Parameters, Frequency and Duration

| Monitoring Station | Parameter and Duration | Frequency | |
|-------------------------------------|--|------------------------|--|
| ID 1A, ID 2, ID 3, ID 4 & ID5 | 30-mins measurement at each monitoring station between 0700 and 1900 on normal weekdays. Leq, L ₁₀ and L ₉₀ would be recorded. | At least once per week | |

3.5 Monitoring Methodology

3.5.1 Monitoring Procedure

- (a) The sound level meter was set on a tripod at a height of 1.2 m above the ground.
- (b) Façade measurements were made at all monitoring locations.
- (c) The battery condition was checked to ensure the correct functioning of the meter.
- (d) Parameters such as frequency weighting, the time weighting and the measurement time were set as follows:
 - (i) frequency weighting: A
 - (ii) time weighting: Fast
 - (iii) time measurement: $L_{eq(30-minutes)}$ during non-restricted hours i.e. 07:00-1900 on normal weekdays; $L_{eq(5-minutes)}$ during restricted hours i.e. 19:00-23:00 and 23:00-07:00 of normal weekdays, whole day of Sundays and Public Holidays
- (e) Prior to and after each noise measurement, the meter was calibrated using the acoustic calibrator for 94dB(A) at 1000 Hz. If the difference in the calibration level before and after measurement was more than 1 dB(A), the measurement would be considered invalid and repeat of noise measurement would be required after re-calibration or repair of the equipment.
- (f) During the monitoring period, the L_{eq}, L₁₀ and L₉₀ were recorded. In addition, site conditions and noise sources were recorded on a standard record sheet.
- (g) Noise measurement was paused during periods of high intrusive noise (e.g. dog barking, helicopter noise) if possible. Observations were recorded when intrusive noise was unavoidable.
- (h) Noise monitoring was cancelled in the presence of fog, rain, wind with a steady speed exceeding 5m/s, or wind with gusts exceeding 10m/s.

3.5.2 Maintenance and Calibration

- (a) The microphone head of the sound level meter was cleaned with soft cloth at regular intervals.
- (b) The meter and calibrator were sent to the supplier or HOKLAS laboratory to check and calibrate at yearly intervals.
- (c) Calibration certificates of the sound level meters and acoustic calibrators are provided in Appendix D.

3.6 Monitoring Schedule for the Reporting Month

3.6.1 The schedule for environmental monitoring in May 2016 is provided in Appendix E.

3.7 Monitoring Results

3.7.1 The monitoring results for noise are summarized in Table 3.4 and the monitoring data is provided in Appendix G.

Table 3.4 Summary of Impact Noise Monitoring Results in the Reporting Period

| | Average, dB(A), | Range, dB(A), | Limit Level, dB(A), |
|-------|---------------------------|---------------------------|---------------------------|
| | L _{eq} (30 mins) | L _{eq} (30 mins) | L _{eq (30 mins)} |
| ID 1A | 63.5 | 61.7 - 66.2 | *65/70 |
| ID 2 | 60.5 | 55.6 - 63.5 | 75 |
| ID 3 | 61.3 | 55.0 - 64.0 | 75 |
| ID 4 | 62.5 | 57.4 - 64.8 | *65/70 |
| ID 5 | 62.1 | 55.6 - 65.3 | *65/70 |

Note: *Daytime noise Limit Level of 70dB(A) applies to education institutions while 65dB(A) applies during school examination period.

- 3.7.2 According to the information provided by the Contractor, no noise complaint was received in the reporting month; hence, no Action Level exceedance was recorded.
- 3.7.3 No Limit Level exceedance of noise was recorded at all monitoring stations in the reporting month.
- 3.7.4 The event action plan is annexed in Appendix I.
- 3.7.5 Major noise sources during the noise monitoring included construction noise from the Project site, construction noise from other construction sites nearby, nearby traffic noise and noise from school activities and community noise.
- 3.7.6 The examination dates of Territory-wide System Assessment (TSA) of Sau Ming Primary School (ID4) and Sau Mau Ping Catholic Primary Scholl (ID5) was from 3 May 2016 to 4 May 2016. No noise monitoring was conducted during the period. Thus the daytime noise limit level at those two monitoring points remained unchanged.

4 ENVIRONMENTAL SITE INSPECTION AND AUDIT

4.1 Site Inspection

- 4.1.1 Site Inspections were carried out on a weekly basis to monitor the implementation of proper environmental pollution control and mitigation measures for the Project. In the reporting month, 4 site inspections were carried out on 5, 12, 18 and 26 May 2016. Particular observations and status of non-compliance issued by IEC are described below.
- 4.1.2 The Contractor has rectified most of the observations as identified during the environmental site inspections in the reporting month within an agreed time frame. Rectification of the remaining identified items are undergoing by the Contractor. Follow-up inspections on the status on provision of mitigation measures will be conducted to ensure all identified items are mitigated properly.

4.1.3 Air Quality Impact

- Mud trail and sand were found on the public road and at the site entrance on Road L3. The Contractor should remove the dusty material and enhance the efficiency of wheel washing facilities to suppress dust generation.
- The Contractor should implement dust control measures during drilling and rock dowel.
- Exposed slope near Footbridge C was observed without coverage. The Contractor should cover the slope with impervious sheeting to suppress dust generation and to avoid generation of muddy water during rain.

4.1.4 Construction Noise Impact

Nil

4.1.5 Water Quality Impact

- Rubbish and construction materials were observed inside the U-channel and drainage near Footbridge A. The Contractor should remove the rubbish and construction materials to prevent drainage blockage.
- Construction material and sand were found around the U-channel near Footbridge A. The Contractor should clean them to prevent drainage blockage and to avoid surface runoff containing muddy water.

4.1.6 Chemical and Waste Management

- Fallen oil drums were found without placing inside drip trays at Footbridge A and near Road L1. The Contractor should provide oil drums with drip trays to prevent oil leakage. And the Contractor was reminded to regularly remove the stagnant water inside the drip tray at Footbridge A to avoid mosquito breeding.
- Chemical containers were found without placing inside a drip tray near Road L3. The Contractor should provide the chemical containers with a drip tray to prevent chemical leakage.
- General refuse was found at Footbridge B. The Contractor should remove the refuse to maintain the site in a clean and tidy condition.
- Oil stain was found at Footbridge A. The Contractor should clear the oil stain and treat it as chemical waste.
- A chemical container without placing inside a drip tray was observed at Footbridge A. The Contractor should provide the chemical container with a drip tray to prevent chemical leakage.

Monthly EM&A Report for May 2016

- Construction waste and refuse were observed near the Footbridge A. The Contractor should remove them to maintain proper housekeeping.
- Drip holes of a drip tray was found without blockage at Footbridge A. The Contractor was reminded to block the drip holes at Footbridge A to avoid oil leakage. (Reminder)
- 4.1.7 Landscape and Visual Impact
 - Nil

4.1.8 Miscellaneous

- Fallen oil drums were found without placing inside drip trays at Footbridge A and near Road L1. The Contractor should provide oil drums with drip trays to prevent oil leakage. And the Contractor was reminded to regularly remove the stagnant water inside the drip tray at Footbridge A to avoid mosquito breeding.
- Stagnant water and rubbish were observed inside the U-channel near Road L1. The Contractor should remove the water and rubbish to prevent mosquito from breeding.
- Stagnant water was observed near the manhole at Footbridge A. The Contractor should backfill the puddle or remove the water to prevent mosquito breeding.

4.2 Advice on the Solid and Liquid Waste Management Status

- 4.2.1 The Contractor is registered as a chemical waste producer for this Project. C&D materials and wastes sorting were carried out on site. Receptacles were available for C&D wastes and general refuse collection.
- 4.2.2 As advised by the Contractor, a total of 1795.43 m³ C&D material was generated on site in the reporting month. 975.67 m³ of hard rock and large broken concrete was generated and transferred to Anderson Road Quarry for further process.
 - For C&D waste, 0 kg of metals was generated and collected by registered recycling collector. 10 kg of paper cardboard packing and 10 kg of plastic were generated on site and collected by registered recycling collector. No chemical waste was collected by licensed chemical waste collectors. 213.49 tonnes of other types of wastes (e.g. general refuse and tree debris) were generated on site and disposed of at North East New Territories (NENT) Landfill.
- 4.2.3 The Contractor is advised to properly maintain on site C&D materials and wastes collection, sorting and recording system and maximize reuse / recycle of C&D materials and wastes. The Contractor is reminded to properly maintain the site tidiness and dispose of the wastes accumulated on site regularly and properly.
- 4.2.4 The Contractor is reminded that chemical waste containers should be properly treated and stored temporarily in designated chemical waste storage area on site in accordance with the Code of Practise on the Packaging, Labelling and Storage of Chemical Wastes.

4.3 Environmental Licenses and Permits

4.3.1 The environmental licenses and permits for this Project and valid in the reporting month is summarized in Table 4.1.

Table 4.1 Summary of Environmental Licensing and Permit Status

| Statutory Reference | Description | Permit No. | Valid Period | | Remarks | |
|------------------------|--|-------------------|--------------|----------|--|--|
| Reference | Description | i ciniic ivo. | From | То | Kemarko | |
| EIAO | Environmental Permit | EP-140/2002 | | | - Widening of a section of Po Lam Road | |
| APCO | NA notification | | 16/04/09 | | - Whole Construction Site | |
| WPCO | Discharge License | WT00020353-2014 | 04/12/14 | 31/08/19 | - Discharge of Construction Runoff | |
| WDO | Chemical Waste Producer Registration | 5213-292-C3249-32 | 19/03/08 | | - Whole Construction Site | |
| | Waste Charges Account | 7006839 | 12/03/08 | | - Whole Construction Site | |
| NCO | Construction Noise Permit | GW-RE0094-16 | 09/02/16 | 08/08/16 | - Whole Construction Site | |

4.4 Implementation Status of Environmental Mitigation Measures

- 4.4.1 In response to the site audit findings, the Contractor carried out corrective actions promptly for particular items recorded. Outstanding items were closely monitored to ensure mitigation measures are implemented properly.
- 4.4.2 A summary of the Implementation Schedule of Environmental Mitigation Measures (EMIS) is presented in Appendix B. Many necessary mitigation measures were implemented properly.

4.5 Summary of Exceedances of the Environmental Quality Performance Limit

- 4.5.1 All 1-hour TSP and 24-hour TSP results were below the Action and Limit Levels in the reporting month.
- 4.5.2 According to the information provided by the Contractor, no noise complaint was received in the reporting month; hence, no Action Level exceedance was recorded.
- 4.5.3 No Limit Level exceedance for noise was recorded at all monitoring stations in the reporting month.
- 4.5.4 Cumulative statistics on exceedances is provided in Appendix J.

4.6 Summary of Complaints, Notification of Summons and Successful Prosecutions

- 4.6.1 Complaints shall be referred to the ET Leader for action. The ET Leader shall undertake the following procedures upon receipt of any complaint:-
 - Log complaint and date of receipt onto the complaint database and inform the IC(E) immediately;
 - Investigate the complaint to determine its validity, and assess whether the source of the problem is due to works activities;

- Monthly EM&A Report for May 2016 • Identify mitigation measures in consultation with the IC(E) if a complaint is valid and due to works:
 - Advise the Contractor if additional mitigation measures are required:
 - Review the Contractor's response to identified mitigation measures, and the updated
 - If the complaint is transferred from EPD, submit interim report to EPD on status of the complaint investigation and follow-up action within the time frame assigned by EPD:
 - Undertake additional monitoring and audit to verify the situation if necessary, and review that circumstances leading to the complaint to not recur:
 - Report investigation results and subsequent actions to complainant (if the source of complaint is EPD, the results should be reported within the time frame assigned by EPD); and
 - Record the complaint, investigation, the subsequent actions and the results in the monthly EM&A reports.
- 4.6.2 During any complaint investigation work, the Contractor and the ER shall cooperate with the ET Leader in providing all necessary information and assistance for completion of the investigation. If mitigation measures are identified in the investigation, the Contractor shall promptly carry out the mitigation. The ER shall ensure that all necessary measures have been carried out by the Contractor.
- 4.6.3 Referring to the information provided by the Contractor, no environmental complaint and no notification of summons and successful prosecution were received in the reporting month.
- Cumulative statistics on complaints, notification of summons and successful prosecutions is 4.6.4 provided in Appendix J.

5 FUTURE KEY ISSUES

5.1 Construction Programme for the Coming Two Months

- 5.1.1 The major construction works in June and July 2016 will be:-
- Slope stabilization and upgrading works at Portion C and E
- Earthwork and C&D stockpile at Portion A and C
- Temporary traffic arrangement and road work at J/O Po Lam Road, J/O Sau Mau Ping Road and J/O Lee On Road
- Toe / Berm planter and platform drainage construction on slope
- Retaining wall backfilling works at R16
- Trench excavation and drainage works at public road
- Watermain works at public road
- Installation of permanent railings at main site, slope berm and footbridge A
- Asphalt laying and road marking works at L2 road
- Brick laying at footpath at L2 road
- Landscaping works at footpath, slope and public area
- Stormwater tank and main site drainage clearing and remedial works
- Installation of watermain downpipe at Po Lam Road CP2, Lee On Road Sewer A and Sau Mau Ping Road Sewer B
- Lift installation works at footbridge A
- E & M works at footbridge A and Stormwater tank
- Erection/Dismantle of bamboo scaffoldings works at footbridge A, B and C
- Cement decoration works at footbridge A and subway
- Installation glazing works at footbridge A
- Installation of metal canopy of bus stop station and subway
- Demolition of site hoarding
- Erection of PVC pipes at Footbridge and RE wall
- Erection of Planter at Footbridge B and C

5.2 Key Issues for the Coming Two Months

- 5.2.1 Key issues to be considered in the coming months included:-
 - Properly store and label oil drums and chemical containers placed on site;
 - Proper chemicals, chemical wastes and wastes management;
 - Maintenance works should be carried out within roofed, paved areas with proper drainage system to handle run-off from maintenance works;
 - Collection and segregation of construction waste and general refuse should be carried out properly and regularly;
 - Site runoff should be properly collected and treated prior to discharge;
 - Regular review and maintenance of drainage systems and desilting facilities;
 - Exposed slopes/soil stockpiles should be properly treated to avoid generation of silty surface run-off during rainstorm;
 - Proper mitigation measures should be provided to avoid relocation of treated contaminated soil:
 - Regular review and maintenance of wheel washing facilities provided at all site entrances/exits;
 - Suppress dust generated from work processes with use of bagged cements, earth movements, drilling works, breaking works, excavation activities, exposed areas/slopes/soil stockpiles and haul road traffic;
 - Conduct regular inspection of the working machineries within works area to avoid any dark smoke emission and oil leakage;
 - Quieter powered mechanical equipment should be used:
 - Provision of proper and effective noise control measures, such as erection of movable noise barriers during blasting, breaking and drilling works and at crushing plant works area and provision of acoustic material wrapping to breaking tips of breakers; and
 - Proper protection and regular inspection of existing trees, transplanted/retained trees.

5.3 Monitoring Schedule for the Coming Month

5.3.1 The tentative schedule for environmental monitoring in June 2016 is provided in Appendix E.

6 CONCLUSIONS AND RECOMMENDATIONS

6.1 Conclusions

- 6.1.1 The construction phase of the project commenced in May 2008.
- 6.1.2 1-hour TSP, 24-hour TSP and noise monitoring were carried out in the reporting month.
- 6.1.3 All 1-hour TSP and 24-hour TSP results were below the Action and Limit Levels in the reporting month.
- 6.1.4 According to the Contractor's information, no noise complaint was received in the reporting month. Hence, no Action Level exceedance was recorded.
- 6.1.5 No Limit Level exceedance for noise was recorded at all monitoring stations in the reporting month.
- 6.1.6 Environmental site inspections were carried out 4 times in May 2016. Recommendations on remedial actions were given to the Contractor for the deficiencies identified during the site audit.
- 6.1.7 According to the information provided by the Contractor, no environmental complaint and no notification of summons and successful prosecution were received in the reporting month.

6.2 Recommendations

6.2.1 According to the environmental site inspections performed in the reporting month, the following recommendations were provided:-

Air Quality Impact

- Mud trail and sand on the public road and at the site entrance on Road L3 should be removed.
 The efficiency of wheel washing facilities should be enhanced to suppress dust generation.
- Dust control measures should be implemented during drilling and rock dowel.
- Exposed slope near Footbridge C should be covered with impervious sheeting to suppress dust generation and to avoid generation of muddy water during rain.

Construction Noise Impact

No specific observation was identified in the reporting month.

Water Quality Impact

- Rubbish and construction materials inside the U-channel and drainage near Footbridge A should be removed to prevent drainage blockage.
- Construction material and sand around the U-channel near Footbridge A should be cleaned to prevent drainage blockage and to avoid surface runoff containing muddy water.

Chemical and Waste Management

- Fallen oil drums at Footbridge A and near Road L1 should be provided with drip trays to prevent oil leakage.
- Chemical containers near Road L3 should be provided with a drip tray to prevent chemical leakage.
- General refuse at Footbridge B should be removed to maintain the site in a clean and tidy condition.
- Oil stain at Footbridge A should be cleared and treated as chemical waste.
- A chemical container at Footbridge A should be provided with a drip tray to prevent chemical leakage.
- Construction waste and refuse near the Footbridge A should be removed to maintain proper housekeeping.
- It was reminded to block the drip holes at Footbridge A to avoid oil leakage. (Reminder)

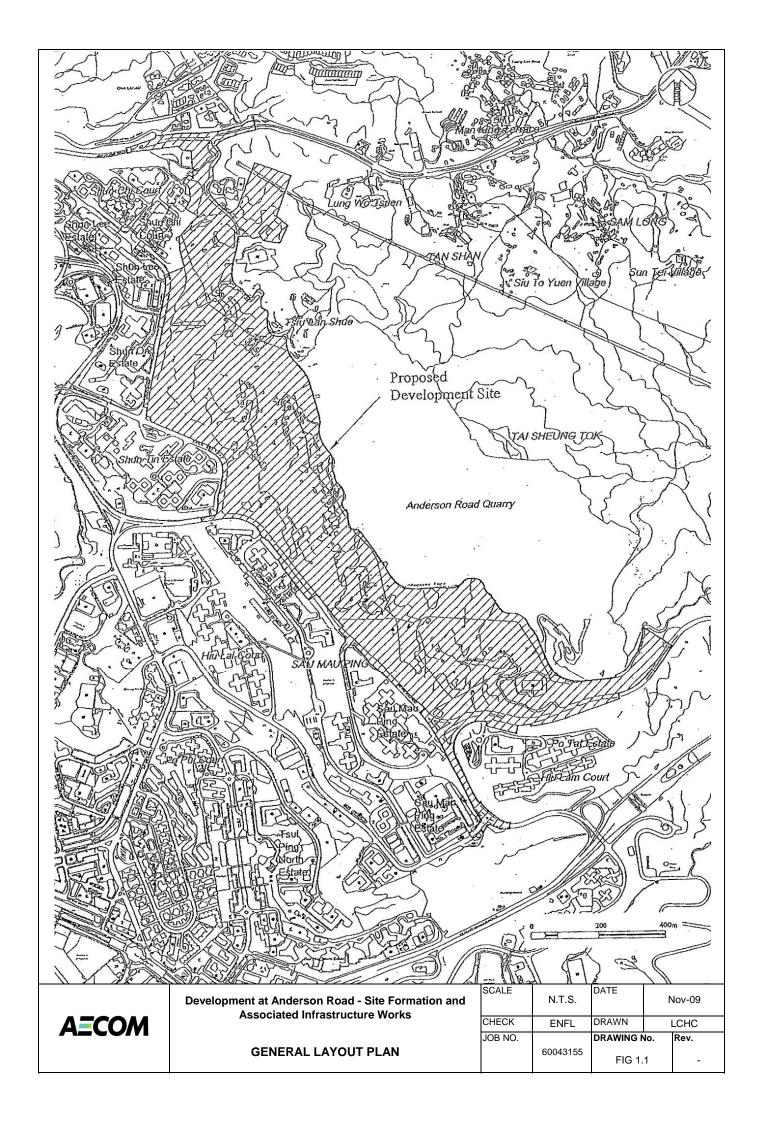

Landscape and Visual Impact

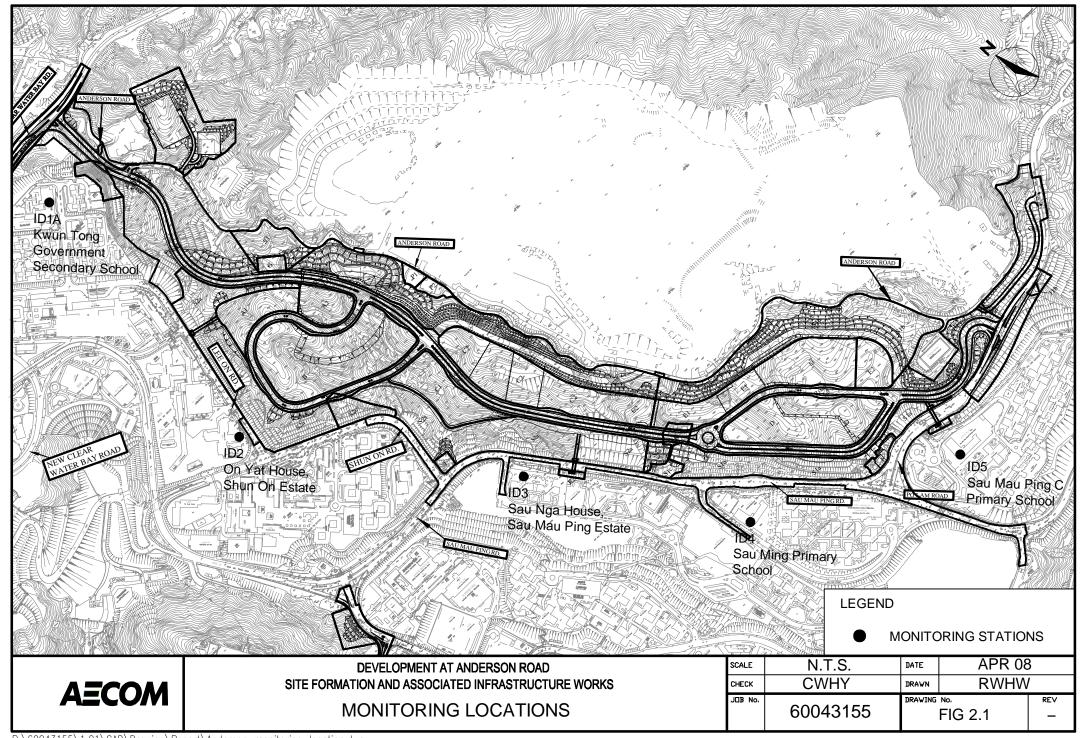

No specific observation was identified in the reporting month.

Miscellaneous

- It was reminded to regularly remove the stagnant water inside the drip tray at Footbridge A to avoid mosquito breeding.
- Stagnant water and rubbish inside the U-channel near Road L1 should be removed to prevent mosquito from breeding.
- The puddle near the manhole at Footbridge A should be backfilled to prevent mosquito breeding.

APPENDIX B

Implementation Schedule of Environmental Mitigation Measures

Appendix B - Implementation Schedule of Environmental Mitigation Measures

| Environmental Mitigation Measures | | Location | Implementation Status |
|-----------------------------------|--|------------------------|-----------------------|
| Construction No | oise Impact | | |
| Site Formation | Silenced powered mechanical equipment (PME) for most equipment | All construction sites | V |
| | (including drill rig, backhoe, dump truck, breaker and crane) and the | | |
| | decrease of percentage on time usage of drill rig among the Central Area | | |
| | from 50% to 40% is proposed. | | |
| | Temporary movable noise barrier shall be used to shield the noise | All construction sites | V |
| | emanating from the drilling rig in order to provide adequate shielding for the | | V |
| | affected NSRs. | | |
| Construction Ai | r Quality Impact | | |
| General Site | Mean vehicle speed of haulage trucks at 10km/hr. | All construction sites | V |
| Practice | Twice daily watering of all open site areas. | All construction sites | V |
| | Regular watering (once every 1 hour) of all site roads and access roads with | All acretices sites | @ |
| | frequent truck movement. | All construction sites | |
| | During road transportation of excavated spoil, vehicles should be covered to | All construction sites | V |
| | avoid dust impact. Wheel washing facilities should be installed at all site | | |
| | exits together with regular watering of the site access roads. | | |
| | Tarpaulin covering of all dusty vehicle loads transported to, from and | All acretical sites | V |
| | between site locations. | All construction sites | |
| | Establishment and use of vehicle wheel and body washing facilities at the | Site exits | V |
| | exit points of the site, combined with cleaning of public roads were | | |
| | | | |

| | necessary. | | |
|---------------------------|--|------------------------|-----|
| General Site | Suitable side and tailboards on haulage vehicles. | All construction sites | V |
| Practice | Watering of temporary stockpiles. | All construction sites | V |
| Blasting | Use of select aggregate and fines to stem the charge with drill holes and watering of blast face. | All construction sites | N/A |
| | Use of vacuum extraction drilling methods. | All construction sites | N/A |
| | Carefully sequenced blasting. | All construction sites | N/A |
| Crushing | Fabric filters installed for the crushing plant. | All construction sites | V |
| | Water sprays on the crusher. | All construction sites | V |
| Loading and Unloading | Water sprays at all fixed loading and unloading points (at the crusher and conveyor belts). | All construction sites | V |
| Points, and conveyor Belt | The loading point at the crusher is enclosed with dust collection system installed. | All construction sites | V |
| System | When transferring materials from conveyor belt or crusher to the dump trucks, chutes or dust curtains are used for controlling dust. | All construction sites | V |
| | Cover the conveyor belts with steel roof and canvas sides. | All construction sites | V |
| Construction W | ater Quality Impact | | |
| Construction | All active working areas should be bounded to retain storm water with | Site drainage system | V |
| Phase | sufficient retention time to ensure that suspended solids are not discharged | | |
| | from the site in concentrations above those specified in the TM for the | | |
| | Victoria Harbour (Phase I) WCZ. All fuel storage areas should be bounded | | |

| | with drainage directed to an oil interceptor. | | |
|----------------|---|------------------------|---|
| | Separate treatment facilities may be required for effluent from site offices, | Site drainage system | V |
| | toilets (unless chemical toilets are used) and canteens. | | |
| | Discharged wastewater from the construction sites to surface water and/or | All works area | V |
| | public drainage systems should be controlled through licensing. Discharge | | |
| | should follow fully the terms and conditions in the licenses. | | |
| | Relevant practice for dealing with various type of construction discharges | All works area | @ |
| | provided in EPD's ProPECC Note PN 1/94 should be adopted. | | |
| Waste Managem | nent | | |
| Waste Disposal | Difference types of wastes should be segregated, stored, transported and | All construction sites | @ |
| | disposed of separately in accordance with the relevant legislative | | |
| | requirements and guidelines as proper practice of waste management. | | |
| | Sorting of wastes should be done on-site. Different types of wastes should | All construction sites | V |
| | be segregated and stored in different stockpiles, containers or skips to | | |
| | enhance recycling of materials and proper disposal of spoil. | | |
| | Excavated spoil should be used as much as possible to minimize off-side fill | All construction sites | V |
| | material requirements and disposal of spoil. | | |
| | Chemical waste should be recycled on-site or removed by licenced | All construction sites | V |
| | companies. It should be handled according to the Code of Practice on the | | |

| | , | | |
|---------------|---|------------------------|---|
| | Packaging, Labelling and Storage of Chemical wastes. When off-site | | |
| | disposal is required, it should be collected and delivered by licenced | | |
| | contractors to Tsing Yi Chemical Waste Treatment Facility and disposed of | | |
| | in accordance with the Chemical Waste (General) Regulation. | | |
| | Necessary mitigation measures should be adopted to prevent the | All construction sites | @ |
| | uncontrolled disposal of chemical and hazardous waste into air, soil, surface | | |
| | waters and ground waters. | | |
| Waste Storage | Chemical material storage areas should be bounded, constructed of | All construction sites | @ |
| | impervious materials and have the capacity to contain 120 percent of the | | |
| | total volume of the containers. Indoor storage areas must have sufficient | | |
| | ventilation to prevent the build-up of fumes, and must be capable of | | |
| | evacuating the space in the event of an accidental release. Outdoor storage | | |
| | areas must be covered with a canopy or contain provisions for the safe | | |
| | removal of rainwater. In both cases, storage areas must not be connected to | | |
| | the foul or stormwater sewer system. | | |
| | Dangerous materials as defined under the DGO, including fuel, oil and | All construction sites | V |
| | lubricants, should be stored and properly labelled on site in accordance with | | |
| | the requirements in the DGO. If transportation of hazardous materials is | | |
| | necessary, hazardous materials, chemical wastes and fuel should be | | |
| | packed or stored in containers or vessels of suitable design and construction | | |
| | to prevent leakage, spillage or escape. | | |
| | Human waste should be discharged into septic tanks provided by the | All construction sites | V |
| | contractors and removed regularly by a hygiene services company. Refuse | | |
| | | | |

| | containers such as open skips should be provided at every work site for use | | |
|-------------|--|-------------------|-----|
| | by the workforce. On-site refuse collection points must also be provided. | | |
| Landscape a | nd Visual | | |
| Additional | Planting and vegetation restoration (including transplanted trees) on soil | Whole development | N/A |
| Measures | slopes including restoration of grassland, scrub and woodland on slopes | | |
| | around the development platforms and access road. Restoration would be | | |
| | undertaken using predominantly native species. | | |
| | | | |

| | Colouring of shotcrete slopes. | Whole development | N/A |
| | Limited planting on shotcrete slopes. | Whole development | V |
| | Landscape buffers and planting in and around the development itself to | Whole development | N/A |
| | screen partially close views of the site. | | |
| | Screen planting in front of retaining walls / granite cladding to those walls to | Whole development | N/A |
| | reduce glare and visual impacts. | | |
| | Careful design of road elevated structure and abutments, to limit visual | Whole development | V |
| | impacts. | | |
| | Roadside landscape features / hardworks to limit visual impacts. | Whole development | V |
| | Conservation of CDG or CDV recovered from the site for re-use in the | Whole development | N/A |
| | landscape restoration. | | |
| | Preservation (by transplanting if necessary) of any trees identified as being | Whole development | V |
| | 1 | | |

| | of particular landscape value. | | |
|-------------|---|----------------------------|---------------------|
| Ecology | | | |
| | Woodland planting on soft cut slopes available (about 13.4ha) within the | Soft cut slopes | N/A |
| | development site. Native species, preferably with documented ecological | | |
| | utility, should be used. | | |
| | Seeds of the native species when possible should be added into the | Soft cut slopes | N/A |
| | hydroseeding mix. Seedings should be pit planted with placement of slow | | |
| | release fertilizer. | | |
| | Maintenance and service, including weeding, fertilizing, replacement of | Soft cut slopes | N/A |
| | dead plants, etc. should be performed during the first 1 years of planting to | | |
| | enhance the survival rate of the plants. | | |
| Contaminate | d Land | | |
| | In accordance with the approved Contamination Assessment Report (CAR) | Locations specified in CAR | N/A |
| | and Remediation Action Plan (RAP) in Nov 2006, it is recommended that | | (Works In Progress) |
| | cement solidification / stabilization prior to on-site backfill for heavy metal | | |
| | contaminated soil and excavation followed by disposal at designated landfill | | |
| | for organic contaminated soil. Upon the completion of the proposed | | |
| | remediation exercise as outlined in CAR & RAP, a Remediation Report will | | |
| | be complied for submission to EPD to demonstrate that the proposed soil | | |
| | remediation has been carried out properly and satisfactorily. Results from | | |
| | the confirmation tests will also be included in the Remediation Report. | | |
| | Photos showing the area of excavation, the solidification process, and | | |
| | remediated soil and site shall also be included in the report for reference. | | |

| Landfill Gas Hazard | | | | | | | | |
|---------------------|---|----------------------------|-----|--|--|--|--|--|
| | Further site investigation should be carried out during the detailed design | The whole development site | N/A | | | | | |
| | stage in order to measure landfill gas around the perimeter of the site, to | | | | | | | |
| | re-confirm that there is no preferential pathway for landfill gas migration and | | | | | | | |
| | to assess the potential for landfill gas hazards on the future development. If | | | | | | | |
| | a landfill gas hazard is identified, mitigation measures should be proposed | | | | | | | |
| | and implemented to address the hazard. | | | | | | | |

Ambient conditions

Temperature:

22 ± 1 °C

Relative humidity:

50 ± 10 %

Air pressure:

1010 ± 5 hPa

Test specifications

- The Sound Calibrator has been calibrated in accordance with the requirements as specified in IEC 60942 1997 Annex B
 and the lab calibration procedure SMTP004-CA-156.
- 2, The calibrator was tested with its axis vertical facing downwards at the specific frequency using insert voltage technique.
- 3, The results are rounded to the nearest 0.01 dB and 0.1 Hz and have not been corrected for variations from a reference pressure of 1013.25 hectoPascals as the maker's information indicates that the instrument is insensitive to pressure changes.

Test results

This is to certify that the sound calibrator conforms to the requirements of annex B of IEC 60942: 1997 for the conditions under which the test was performed. This does not imply that the sound calibrator meets IEC 60942 under any other conditions.

Details of the performed measurements are presented on page 2 of this certificate.

Test specifications

1 The Sound Level Meter has been calibrated in accordance with the requirements as specified in BS 7580: Part 1: 1997 and the lab calibration procedure SMTP004-CA-152.

2. The electrical tests were performed using an electrical signal substituted for the microphone which was removed and replaced by an equivalent capacitance within a tolerance of +20%

3. The acoustic calibration was performed using an B&K 4226 sound calibrator and corrections was applied for the difference between the free-field and pressure responsess of the Sound Level Meter.

Test results

This is to certify that the Sound Level Meter conforms to BS 7580: Part 1: 1997 for the conditions under which the test was performed

Details of the performed measurements are presented on page 2 of this certificate.

APPENDIX I

Event Action Plan

Appendix I – Event Action Plan

Event and Action Plan for Air Quality

| Event | ACTION | | | | |
|---|---|--|---|---|--|
| | ET | IC(E) | ER | Contractor | |
| ACTION LEVEL | | | | | |
| Exceedance for one sample | Identify source Inform IC(E) and ER. Repeat measurement to confirm finding. Increase monitoring frequency to daily | Check monitoring data submitted by ET. Check Contractor's working method. | Notify Contractor. | Rectify any unacceptable practice. Amend working methods if appropriate. | |
| Exceedance for two or more consecutive samples | Identify source. Inform IC(E) and ER. Repeat measurements to confirm findings. Increase monitoring frequency to daily. Discuss with IC(E) and Contractor for remedial actions required. If exceedance continues, arrange meeting with IC(E) and ER. If exceedance stops, cease additional monitoring. | Check monitoring data submitted by ET. Check Contractor's working method. Discuss with ET and Contractor on possible remedial measures. Advise ER on the effectiveness of proposed remedial measures. Supervise implementation of remedial measures. | Confirm receipt of notification of failure in writing. Notify Contractor. Ensure remedial actions properly implemented. | Submit proposal for remedial actions to IC(E) within 3 working days of notification. Implement the agreed proposals. Amend proposal if appropriate. | |

Event and Action Plan for Air Quality

| Event | ACTION | | | | |
|--|---|--|--|--|--|
| | ET | IC(E) | ER | Contractor | |
| LIMIT LEVEL | | | | | |
| Exceedance for one sample | Identify source. Inform ER and EPD. Repeat measurement to confirm finding. Increase monitoring frequency to daily. Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results. | Check monitoring data submitted by ET. Check Contractor's working method. Discuss with ET and Contractor on possible remedial measures. Advise ER on the effectiveness of proposed remedial measures. Supervise implementation of remedial measures. | Confirm receipt of notification of failure in writing. Notify Contractor. Ensure remedial actions properly implemented. | Take immediate action to avoid further exceedance. Submit proposals for remedial actions to IC(E) within 3 working days of notification. Implement the agreed proposals Amend proposal if appropriate. | |
| Exceedance for two or more consecutive samples | Identify source. Inform ER and EPD. Repeat measurements to confirm finding. Increase monitoring frequency to daily. Carry out analysis of Contractor's working procedures to determine possible mitigation to by implemented. Arrange meeting with IC(E) and ER to discuss the remedial actions to be taken. Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results. If exceedance stops, cease additional monitoring. | Discuss amongst ER, ET and Contractor on the potential remedial actions. Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise ER accordingly. Supervise implementation of remedial measures. | Confirm receipt of notification of failure in writing. Notify Contractor. In consultation with IC(E), agree with Contractor on the remedial measures to be implemented. Ensure remedial measures properly implemented. If exceedance continues, consider what portion of the work is responsible and instruct Contractor to stop the portion of work until the exceedance is abated. | Take immediate action to avoid further exceedance. Submit proposals for remedial actions to IC(E) within 3 working days of notification. Implement the agreed proposals. Amend proposal if appropriate. | |

Event and Action Plan for Noise

| Event | Action | | | | |
|-------------|---|--|--|--|--|
| | ET | IC(E) | ER | Contractor | |
| | Notify IC(E) and Contractor. Carry out investigation. Report the results of investigation to IC(E) and Contractor. Discuss with Contractor and formulate remedial measures. Increase monitoring frequency to check mitigation effectiveness. | Review the analysed results submitted by ET. Review the proposed remedial measures by the Contractor and advise ER accordingly. Supervise the implementation of remedial measures. | Confirm receipt of notification of failure in writing. Notify Contractor. Require Contractor to propose remedial measures for the analysed noise problem. Ensure remedial measures are properly implemented. | Submit noise mitigation proposals to IC(E). Implement noise mitigation proposals. | |
| Limit Level | Notify IC(E), ER, EPD and Contractor. Identify sources. Repeat measurements to confirm finding. Increase monitoring frequency. Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented. Inform IC(E), ER and EPD the causes and actions taken for the exceedance. Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results. If exceedance stops, cease additional monitoring. | Discuss amongst ER, ET and Contractor on the potential remedial actions. Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise ER accordingly. Supervise the implementation of remedial measures. | Confirm receipt of notification of failure in writing. Notify Contractor. Require Contractor to propose remedial measures for the analysed noise problem. Ensure remedial measures are properly implemented If exceedance continues, consider what portion of the work is responsible and instruct Contractor to stop that portion of work until the exceedance is abated. | Take immediate action to avoid further exceedance. Submit proposals for remedial actions to IC(E) within 3 working days of notification. Implement the agreed proposals. Resubmit proposals if problem still not under control. Stop the relevant portion of works as determined by ER until the exceedance is abated. | |

APPENDIX J

Cumulative Statistics of Exceedances, Complaints, Notification of Summons and Successful Prosecutions

Appendix J - Cumulative Statistics on Exceedances, Complaints, Notification of Summons and Successful Prosecutions

Cumulative statistics on Exceedances

| | | Total no. recorded in this | Total no. recorded since |
|-------------|--------|----------------------------|--------------------------|
| | | month | project commencement |
| 1-Hour TSP | Action | - | - |
| | Limit | - | - |
| 24-Hour TSP | Action | - | 15 |
| | Limit | - | 1 |
| Noise | Action | - | 32 |
| | Limit | - | 1 |

Cumulative statistics on Complaints, Notifications of Summons and Successful Prosecutions

| | Date Received | Subject | Status | Total no. recorded in this month | Total no. recorded since project commencement |
|----------------------------|------------------|---------|--------|---|---|
| Environmental complaints | - | - | - | - | 74 |
| Notification of summons | - | - | - | - | 6 |
| Successful Prosecutions | - | - | - | - | 2 |
