PART D PROPOSED VARIATIONS TO THE CONDITIONS IN CURRENT ENVIRONMENTAL PERMIT

D1.	D2.	D3.	D4.	D5.	D6.	D7.
Condition(s) in the Current Environmental Permit :	Proposed Variation(s):	Reason for Variation(s):	Describe the environmental changes arising from the proposed variation(s):	Describe how the environment and the community might be affected by the proposed variation(s):	Describe how and to what extent the environmental performance requirements set out in the EIA report previously approved or project profile previously submitted for this project may be affected:	Describe any additional measures proposed to eliminate, reduce or control any adverse environmental impact arising from the proposed variation(s) and to meet the requirements in the Technical Memorandum on Environmental Impact Assessment Process:
Conditions 2.1, and 2.4	Varying the operation requirements of Diamond Hill Crematorium (DHC) in respect of operation hours and number of cremation. Hence, Conditions 2.1 & 2.4 are proposed to be varied.	The proposed variation allows DHC to cater for the foreseeable occurrence of upsurge of demand of cremation service due to the service suspension of Kwai Chung Crematorium for reprovisioning and the local custom during the Lunar New Year Period. Since the Specified Process (SP) Licence issued by EPD under APCO has already controlled the emission of air pollutant in the exhaust gas of the DHC, Conditions 2.1 & 2.4 proposed to be varied to avoid unnecessary duplicate legislative control.	The proposed variation may affect the chimney emission from the operation of DHC.	The proposed variation will not adversely affect the environment and the community given that the chimney emission from the operation of DHC is under controlled by the SP Licence.	comply with requirements of the SP Licence. Hence, the	Given the chimney emission from the operation of the DHC with the proposed variation still comply with the relevant environmental performance requirements set out in the EIA Report, no additional measures are required.
