

Residents living at the periphery of Mai Po Lo Wai have extensive view of abandoned agriculture fields and fishponds in the foreground.

Existing drainage structures and maintenance access to Mai Po Floodwater Pumping Station dominates the views from Mai Po Lo Wai and Mai Po Sun Tsuen.

Key Plan

**Existing Condition**

View southwest from the dam, which formed part of existing flooding prevention measures for the villages. This view represents the visual quality of residents living in Mai Po Lo Wai and Mai Po San Tsuen. (VSR7Residents of Mai Po Village Settlement).

Visual quality of elevated views from adjacent residents largely remains unchanged.

Utilised existing engineering structures to accommodate cycle track minimises the cumulative visual impact.

**Day 1 of Operation Phase without landscape mitigation measures**

View southwest from the dam, which formed part of existing flooding prevention measures for the villages.
