Remark:
[1] NO/NO2 ratio was calculated based on emission factors at running speed of 5kph from EMFAC-HK.
[2] NOx cold idling emission factors was referenced to "Calculation of Start Emissions in Air Quality Impact Assessment" published by EPD.
[3] Due to lack of information, NOx cold idling emission factor for Euro V PLB(Diesel) was referenced to the corresponding hot idling emission factor.
[4] Due to lack of information, RSP cold idling emission factor was referenced to the corresponding hot idling emission factor.
[5] Reference was made to Table 42 of VEADV.
[6] Reference was made to Table 43 of VEADV.
[7] Reference was made to the approved EIA Report (AEIAR-161/2011) for "Liantang / Heung Yuen Wai Boundary Control Point and Associated Works".
[8] As a conservative approach, Emission Factor of RSP and FSP were assumed to be equal to Emission Factor of PM.
[9] Due to lack of information, NOx hot idling emission factor was referenced to the corresponding cold idling emission factor from "Calculation of Start Emissions in Air Quality Impact Assessment" published by EPD.
[10] Due to lack of information, RSP hot idling emission factor for PLB(LPG) was referenced to hot idling emission factor for PLB(Diesel).
[11] Reference was made to Table 45 of VEADV.
[12] Reference was made to Table 46 of VEADV.
[13] Reference was made to Table 27 of VEADV.
[14] Due to lack of information, NOx cold idling emission factor for Euro IV NFB6 and Euro V NFB6 were referenced to the corresponding cold idling emission factor for Euro IV NFB7 and Euro V NFB8, respectively.
[15] Due to lack of information, NOx cold idling emission factor for Euro V NFB7 was referenced to the corresponding cold idling emission factor for Euro V NFB8.
[16] Due to lack of information, NOx cold idling emission factor for Euro II NFB8 and Euro III NFB8 were referenced to the corresponding hot idling emission factor.
[17] Due to lack of information, NOx cold idling emission factor for Euro IV HGV7 was referenced to the corresponding cold idling emission factor for Euro IV HGV9.
[18] Due to lack of information, NOx cold idling emission factor for Euro II HGV8 was referenced to the corresponding hot idling emission factor.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Site A3 Bus Terminus

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Airport (Ground Transportation Centre) Bus Terminus - PTI_GTC02

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Heavy Good Vehicles >24t (HGV9) was assumed for Heavy Good Vehicles as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

HZMB Hong Kong Port PTI - Layby 7

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

HZMB Hong Kong Port PTI - Layby 8

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Heavy Good Vehicles > 24t (HGV9) was assumed for Heavy Good Vehicle as conservative approach.

HZMB Hong Kong Port PTI - Layby 8

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Heavy Good Vehicles > 24t (HGV9) was assumed for Heavy Good Vehicle as conservative approach.
[4] It is assumed that the distance from start place to egress to be 150m.

HZMB Hong Kong Port PTI - Layby 9

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Tung Chung Station Bus Terminus

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.

Tung Chung Station Bus Terminus

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Tung Chung Station Bus Terminus

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Tung Chung Temporary Bus Terminus

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.

Tung Chung Temporary Bus Terminus

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.

Remark:

[1] The PTI exhaust parameters including coordinates, perimeters, rotation angle, exit velocity, stack diameter and exit temperature are made reference to the approved EIA Report (AEIAR-235/2022) for Tung Chung Line Extension.

[2] Release height for emission inside bus terminus were made reference to Appendix 3.8 of the approved EIA Report AEIAR-237/2022 for Tung Chung Line Extension.

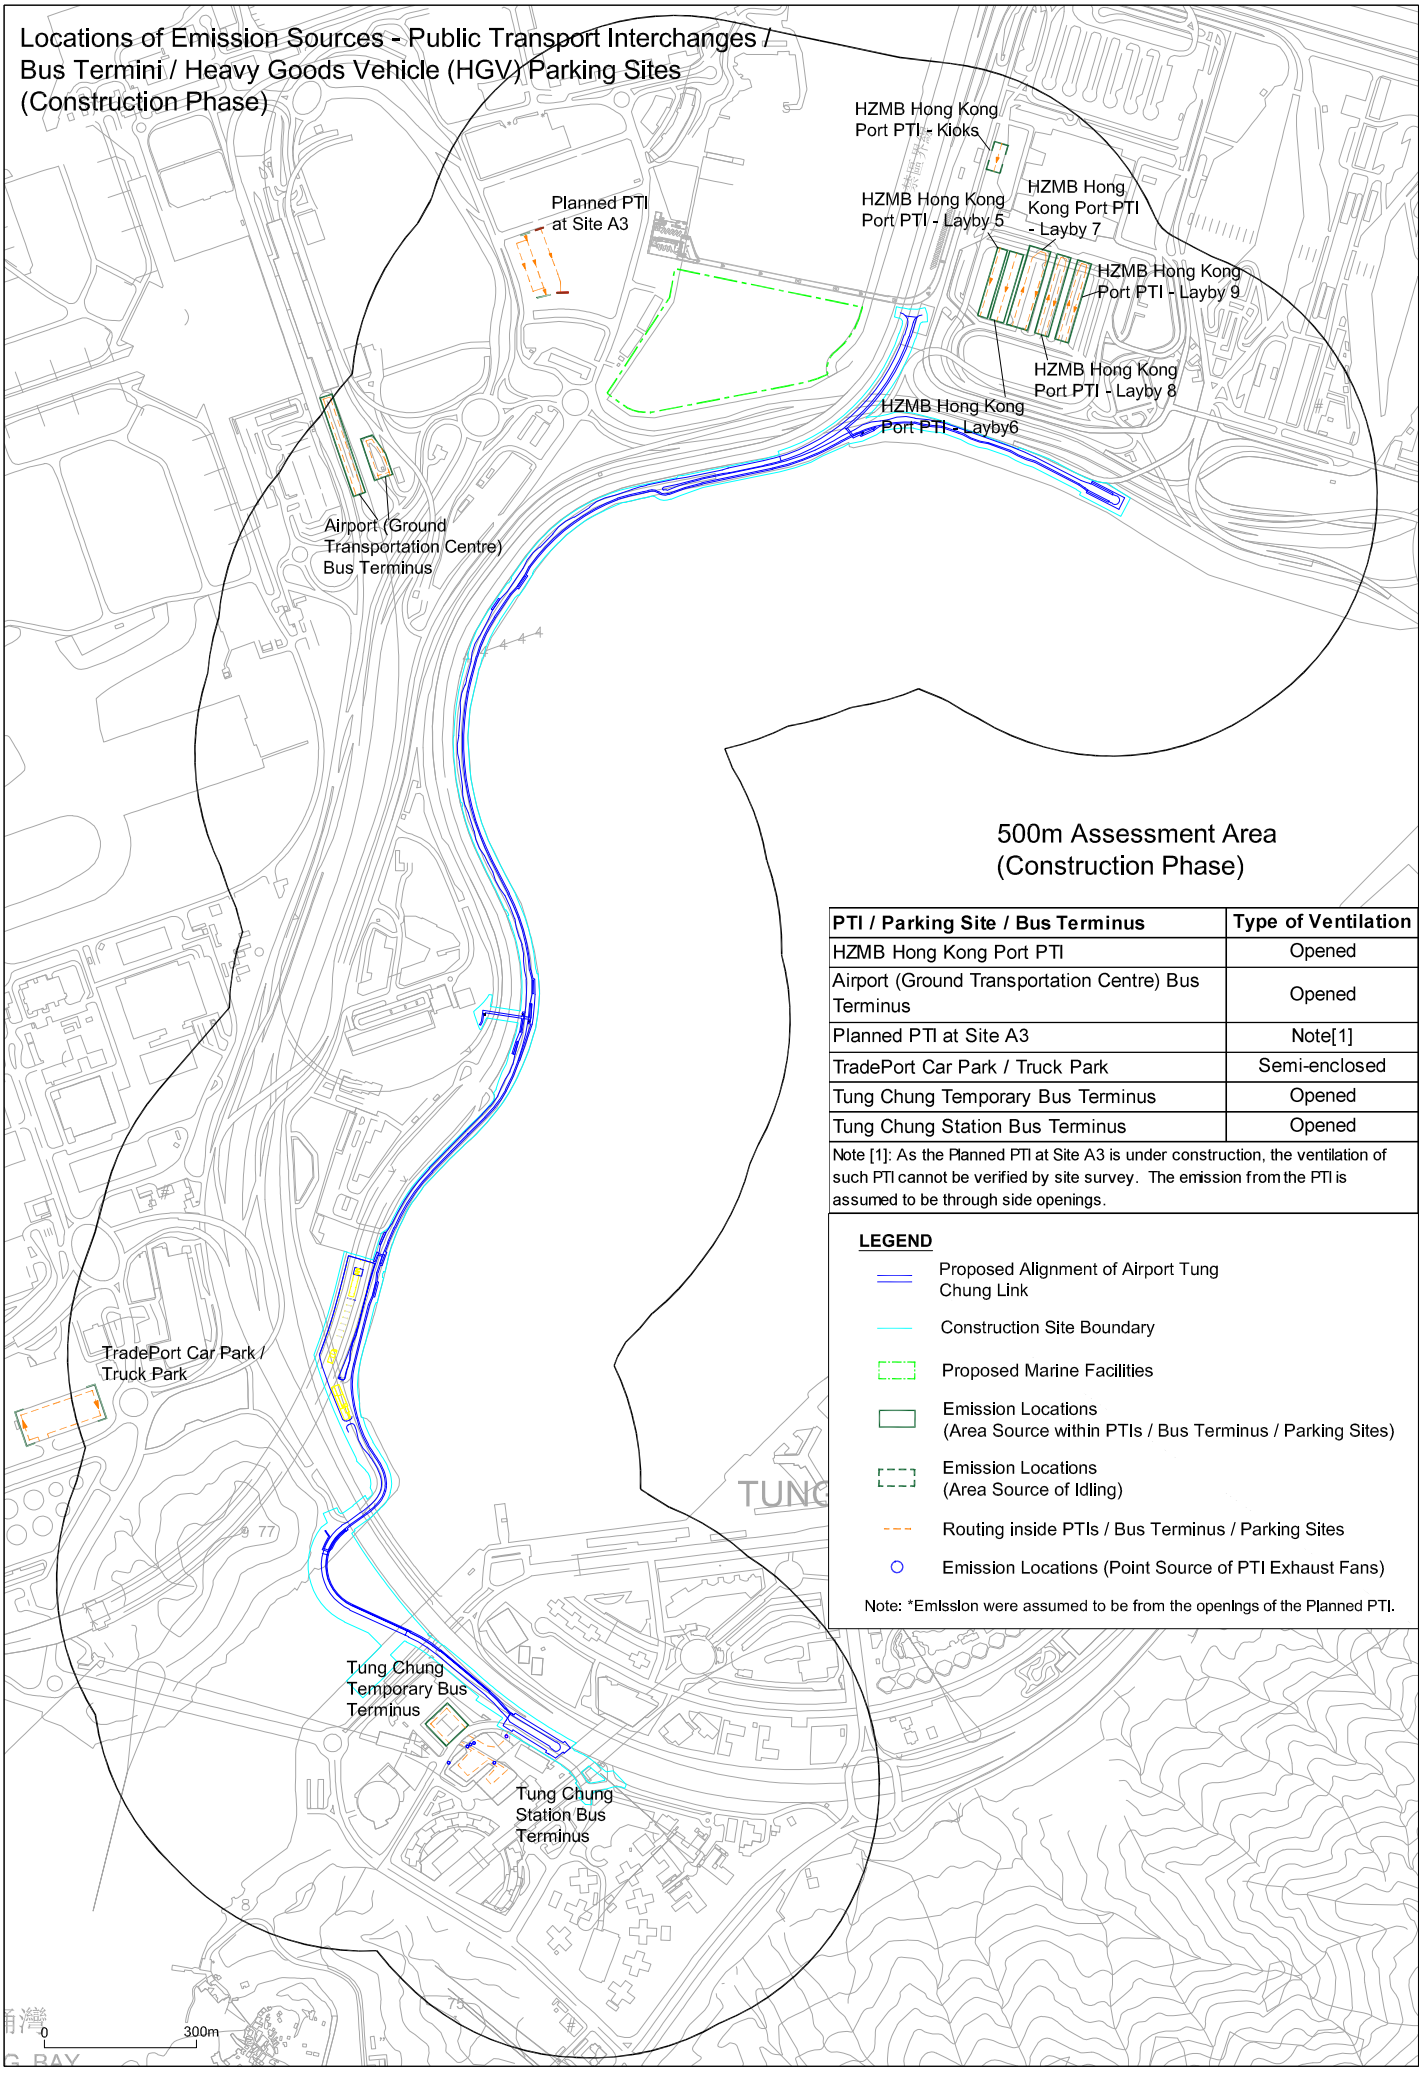
Locations of Emission Sources - Public Transport Interchanges / Bus Termini / Heavy Goods Vehicle (HGV) Parking Sites (Construction Phase)



PTI / Parking Site / Bus Terminus	Type of Ventilation
HZMB Hong Kong Port PTI	Opened
Airport (Ground Transportation Centre) Bus Terminus	Opened
Planned PTI at Site A3	Note[1]
TradePort Car Park / Truck Park	Semi-enclosed
Tung Chung Temporary Bus Terminus	Opened
Tung Chung Station Bus Terminus	Opened

Note [1]: As the Planned PTI at Site A3 is under construction, the ventilation of such PTI cannot be verified by site survey. The emission from the PTI is assumed to be through side openings.

Remark:
[1] NO/NO2 ratio was calculated based on emission factors at running speed of 5kph from EMFAC-HK.
[2] NOx cold idling emission factors was referenced to "Calculation of Start Emissions in Air Quality Impact Assessment" published by EPD.
[3] Due to lack of information, NOx cold idling emission factor for Euro V PLB(Diesel) was referenced to the corresponding hot idling emission factor.
[4] Due to lack of information, RSP cold idling emission factor was referenced to the corresponding hot idling emission factor.
[5] Reference was made to Table 42 of VEADV.
[6] Reference was made to Table 43 of VEADV.
[7] Reference was made to the approved EIA Report (AEIAR-161/2011) for "Liantang / Heung Yuen Wai Boundary Control Point and Associated Works".
[8] As a conservative approach, Emission Factor of RSP and FSP were assumed to be equal to Emission Factor of PM.
[9] Due to lack of information, NOx hot idling emission factor was referenced to the corresponding cold idling emission factor from "Calculation of Start Emissions in Air Quality Impact Assessment" published by EPD.
[10] Due to lack of information, RSP hot idling emission factor for PLB(LPG) was referenced to hot idling emission factor for PLB(Diesel).
[11] Reference was made to Table 45 of VEADV.
[12] Reference was made to Table 46 of VEADV.
[13] Reference was made to Table 27 of VEADV.
[14] Due to lack of information, NOx cold idling emission factor for Euro IV NFB6 and Euro V NFB6 were referenced to the corresponding cold idling emission factor for Euro IV NFB7 and Euro V NFB8, respectively.
[15] Due to lack of information, NOx cold idling emission factor for Euro V NFB7 was referenced to the corresponding cold idling emission factor for Euro V NFB8.
[16] Due to lack of information, NOx cold idling emission factor for Euro II NFB8 and Euro III NFB8 were referenced to the corresponding hot idling emission factor.
[17] Due to lack of information, NOx cold idling emission factor for Euro IV HGV7 was referenced to the corresponding cold idling emission factor for Euro IV HGV9.
[18] Due to lack of information, NOx cold idling emission factor for Euro II HGV8 was referenced to the corresponding hot idling emission factor.

Planned PTI at Site A3

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Planned PTI at Site A3

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Planned PTI at Site A3

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for all Non-Franchised Bus as conservative approach.

Airport (Ground Transportation Centre) Bus Terminus - PTI GTC01

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Remarks:

[1] Release height for emission inside bus terminus were made reference to Appendix 3.8 of the approved EIA Report AEIAR-237/2022 for Tung Chung Line Extension.

[2] Release height for emission outside bus terminus were made reference to Appendix C of Modeling Guidelines for Air Quality Impact Assessment issued by Santa Barbara County APCD in June 2020.

Average Vehicle Height for FBDD, FBSD, PLB and NFB are 4.6, 3.5, 3 and 3.5 m, respectively.

Release height = 0.5 x 1.7 x vehicle height. Daily traffic volume weighted average was applied to the vehicle height.

[3] Initial vertical dimension Szinit = 1.7 x vehicle height/ 2.15. Daily traffic volume weighted average was applied to the vehicle height.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for all Non-Franchised Bus as conservative approach.

HZMB Hong Kong Port PTI - Layby 6

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

HZMB Hong Kong Port PTI - Layby 7

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

HZMB Hong Kong Port PTI - Layby 8

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

HZMB Hong Kong Port PTI - Layby 8

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.

[2] Number of cold starts were provided by the traffic consultant.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] It is assumed that the distance from start place to egress to be 150m.

HZMB Hong Kong Port PTI - Layby 9

Temp: 7 **RH:** 15

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Start Emissions were extracted from Year 2028 of EMFAC-HK v4.3. The lowest temperature and relative humidity data in the whole year (2021) at Chek Lap Kok Weather Station was adopted in the calculation of start emission factors.
[2] Number of cold starts were provided by the traffic consultant.
[3] Non-Franchised Bus 15-24t (NFB8) was assumed for Non-Franchised Bus as conservative approach.

Remarks:

[1] Release height for emission inside bus terminus were made reference to Appendix 3.8 of the approved EIA Report AEIAR-237/2022 for Tung Chung Line Extension.

[2] Release height for emission outside bus terminus were made reference to Appendix C of Modeling Guidelines for Air Quality Impact Assessment issued by Santa Barbara County APCD in June 2020.

Average Vehicle Height for FBDD, FBSD, PLB and NFB are 4.6, 3.5, 3 and 3.5 m, respectively.

Release height = 0.5 x 1.7 x vehicle height. Daily traffic volume weighted average was applied to the vehicle height.

[3] Initial vertical dimension Szinit = 1.7 x vehicle height/ 2.15. Daily traffic volume weighted average was applied to the vehicle height.

PTI / Parking Site / Bus Terminus	Type of Ventilation
HZMB Hong Kong Port PTI	Opened
Airport (Ground Transportation Centre) Bus Terminus	Opened
Planned PTI at Site A3	Note[1]

Note [1]: As the Planned PTI at Site A3 is under construction, the ventilation of such PTI cannot be verified by site survey. The emission from the PTI is assumed to be through side openings.
