## 1. INTRODUCTION

### 1.1 The Project Background

- 1.1.1 AECOM Asia Company Limited has been commissioned by the Highway Department (HyD) to undertake Agreement No. CE 17/2022 (HY) – Widening of Yuen Long Highway (Section between Lam Tei Quarry and Tong Yan San Tsuen Interchange) – Investigation, Design and Construction. The *starting date* of the contract commenced on 18 October 2022 and the completion date is 139 months after the *starting date* tentatively.
- 1.1.2 The scope of the Project, outline layout as shown in **Figure 9.1**, comprises the following principal works elements:
- (a) widening of an approximately 3-kilometre long section of YLH between LTQ and TYSTI from a dual three-lane to a dual four-lane carriageway;
  - (b) modification of the existing interchange near LTQ, Tin Shui Wai West Interchange (TSWWI) and TYSTI, and the associated slip roads to cater for the proposed road widening;
  - (c) associated works including civil, geotechnical, landscaping, road and drainage, public lighting, E&M, traffic control and surveillance system (TCSS), modification of road furniture, re-provisioning of facilities to be affected by the proposed road works and environmental mitigation measures; and
  - (d) the interfacing works with other projects that are set out in the Scope.

### 1.2 Objectives of this Report

- 1.2.1 This Report has been prepared to report the findings of a broad-brush tree survey which was conducted in accordance with Item 2 of Appendix H of EIA Study Brief No. ESB-356/2022 with objectives as follows:
- A preliminary tree survey to survey existing trees within or immediately adjacent to the Project boundary.
  - To identify important tree resources in 500m Assessment Area from the Project boundary, including Old and Valuable Trees (OVTs) and/or Trees of Particular Interest (TPIs) (defined in DevB's TRAM Guidelines) and any tree species of conservation/ landscape significance.
  - The broad-brush tree survey aims to identify impacts on existing trees arising from the Project.

## 2. SURVEY AND ASSESSMENT METHODOLOGY

### 2.1 Date of Survey

- 2.1.1 A broad-brush tree survey consists of 2 parts, including a preliminary tree survey conducted during February – May by sub-contractor “City Connect Company Limited”, and broad-brush tree survey for important tree resources during February – May 2023 by the Certified Arborist of International Society of Arboriculture (ISA), Ms. LEUNG Pui-chi (No. HK-0060A).

### 2.2 Tree Assessment Criteria

- 2.2.1 Existing trees within or adjacent to the Project boundary and TPIs/ OVTs were surveyed and assessed individually. The approximate locations of trees within Study Area and TPIs/OVT were mapped on the survey plans/ location plans in **Appendix D** and **Figures 2.1 to 2.6** respectively. The surveyed TPIs/OVTs were assessed in accordance with the tree survey assessment criteria listed in **Table 1**.

**Table 1** Tree Assessment Criteria

Tree Survey Assessment Criteria		Explanation
Tree No./ Tree Group No.		Reference number assigned to tree groups/ individual trees as shown on survey plans/ location plans (Figures 2.1 to 2.6).
Species	Scientific Name	Guidance on proper use of scientific name of plants is given in the Agriculture, Fisheries and Conservation Department's Nature Conservation Practice Note No.3
	Chinese Name	
	Species Origin	The origin (native/exotic) of the species of the surveyed tree as indicated in “the Flora of Hong Kong Vol.1-4”
Measurements (estimated)	Height (m)	Height of a tree was measured from 'soil level at tree root collar', which is the level of the base of a tree trunk, to the uppermost of tree crown.
	DBH (mm)	DBH of a tree refers to its diameter at breast height (i.e. measured at 1.3m above ground level). Guidance on DBH measurement is given in the Agriculture, Fisheries and Conservation Department's Nature Conservation Practice Note No.2.
	Crown Spread (m)	Spread of a tree was defined by the outermost branches of a tree.
Amenity (High/ Medium/ Low)		Amenity value of a tree was assessed by its functional values for shade, seasonal interest, screening, reduction of pollution and noise and also its fung shui significance, and classified into the following categories: <ul style="list-style-type: none"><li>- High (H): Trees that provide significant functional values and/or significant fung shui value.</li><li>- Medium (M): Trees that provide moderate functional values.</li><li>- Low (L): Trees that provide slight or negligible functional values.</li></ul>
Form (Good/ Average/ Poor)		Form of a tree was assessed by its physical growth form, and classified into the following categories: <ul style="list-style-type: none"><li>- Good (G): Trees with balanced form, upright trunk and a good crown spread.</li><li>- Average (A): Trees of reasonable form and crown spread.</li><li>- Poor (P): Trees with imbalanced form, canopy lopsided, serious leaning trunk or crooked tree trunk.</li></ul>

Tree Survey Assessment Criteria			Explanation
Health Condition (Good/ Average/ Poor)			Health condition of a tree was assessed by its foliage density cover or the presence and severity of visible defects, and classified into the following categories: - Good (G): Trees in good health condition without signs of visible defects. - Average (A): Trees of reasonable health and with few or no visible defects of health problems. - Poor (P): Trees in poor health conditions (e.g. suffered from severe stress, disease, insect/pest infection, thin foliage density cover or dieback of canopy).
Structural Condition (Good/ Average/ Poor)			Structural condition of a tree was assessed by its structural integrity and risks of failure due to structural configuration, and classified into the following categories: - Good (G): Trees without observable significant structural risks. - Average (A): Trees of average structural configuration. - Poor (P): Trees of poor structural configuration, such as heavy leaning, bending, overhanging broken branch, etc.
Suitability for Transplanting	(High/ Medium/ Low)		Assessment took into account conditions of an individual tree at the time of survey (including health, structure, age and root conditions), site conditions (including topography and accessibility), and intrinsic characters of tree species (survival rate after transplanting).
Conservation Status			Rarity and protection status of the species in Hong Kong. Species of conservation importance that are listed in any of the following registers/ guidelines/ ordinances/ publications were highlighted: - Register of Old and Valuable Trees, - Cap.96 Forests and Countryside Ordinance, - Cap.586 Protection and Endangered Species of Animals and Plants Ordinance, or - Rare and Precious Plants of Hong Kong (AFCD, 2003).
Recommendation (Retain / Transplant/ Remove)			Retain: - Retain all tree(s) at its/their existing location(s) as far as practicable. Transplant: - If preservation is not practicable, transplant the affected tree(s) to other permanent location(s) within the project site or the maintenance area to minimise loss of vegetation in the local environs, or - If both preservation and local transplanting are not practicable, transplant the affected tree(s) to other permanent location(s), which would preferably be in adjacent areas in order to maintain its/their amenity value to the neighbourhood. Remove: - If preservation and transplanting is unsuitable or impracticable, - The tree has been irreparably damaged by inclement weather, - Dead tree(s), or - Any other justifications or circumstances.

## 2.3 Relevant Legislations, Guidelines, Database and Publications

2.3.1 In preparing this Report, references for the tree survey methodologies and evaluation of each TPIs/OVTs were made based on the following technical guidelines and publications:

- Development Bureau Technical Circular (Works) No.4/2020 – Tree Preservation;

- Development Bureau Technical Circular (Works) No.5/2020 – Registration and Preservation of Old and Valuable Trees;
- Development Bureau Technical Circular (Works) No. 6/2015 – Maintenance of Vegetation and Hard Landscape Features;
- Agricultural, Fisheries and Conservation Department, Conservation Branch, Nature Conservation Practice Note No.2/2006 – Measurement of Diameter at Breast Height (DBH);
- Agricultural, Fisheries and Conservation Department, Conservation Branch, Nature Conservation Practice Note No.3 – The Use of Plant Names;
- Rare and Precious Plants of Hong Kong (Agricultural, Fisheries and Conservation Department, 2003);
- Forests and Countryside Ordinance (Cap.96) and Forestry Regulations; and
- Protection of Endangered Species of Animals and Plants Ordinance (Cap 586).
- IUCN. 2020. IUCN Red List of Threatened Species. Accessed from [www.iucnredlist.org](http://www.iucnredlist.org) (version 2020-2).

### 3. OVERAL TREE SURVEY FINDINGS

#### 3.1 Trees of the Site

- 3.1.1 Approximately 1,401 nos. existing trees within or immediately adjacent to the Project Site were surveyed. Dominant tree species include *Leucaena leucocephala*, *Senna siamea*, *Acacia confusa* and *Albizia lebbeck*. Most of the existing trees in or adjacent to the Site were in poor to average conditions.
- 3.1.2 Tree species of trees within Study Area and TPIs are presented in assessment schedules in **Appendix A** and **Appendix B** respectively.
- 3.1.3 Photographs of TPIs surveyed individually are provided in **Appendix C**.

#### 3.2 Trees of Particular Interest

- 3.2.1 Total 27 nos. of tree of particular Interest were found within the 500 m assessment area. Most of them are located at roadside planters within 500m assessment area. Eight of them are located within or at the entrance of the Public open space to provide shading canopies or ornamental function for recreational users. A small number of TPIs are located within brownfield site, fenced land lot or closed to graveyard. Most of the TPIs are in average condition.
- 3.2.2 Three large trees of *Ficus microcarpa* were found within the Project limit, including TPI-24 and TPI-25 located on the top of a slope closed to the cycling track near Tan Kwai Tsuen Fresh Water Pumping Station, and TPI-27 located in a roadside planting area closed to Tin Shui Wai West Interchange.
- 3.2.3 One Old and Valuable Tree (OVT No. LCSD YL/1 *Ficus microcarpa*) was found within 500m assessment area but outside the Project limit.
- 3.2.4 The locations of TPIs and OVT are presented in **Figures 2.1 to 2.6**.

### 4. IMPACTS TO EXISTING TREES

#### 4.1 Tree Preservation

- 4.1.1 Approximately 388 nos. of trees within or immediately closed to the Project Site and 25 nos. of TPIs outside the Project footprint will not be affected by the Project and will be retained *in-situ*. All these existing trees will be properly preserved and protected during the construction works in accordance with DEVB TC(W) No. 4/2020.

#### 4.2 Tree Removal/ Transplantation

- 4.2.1 Approximately 1,013 nos. of trees, including 2 nos. of TPIs (TPI-24 and TPI-25), located within the proposed works footprint are proposed to be removed. The affected two TPIs will be preserved as far as practicable, and if affected, transplanting will be considered subject to the detailed tree assessment. Some of these trees would be suitable for transplantation depending on the individual tree conditions and site conditions. The feasibility of tree transplantation will be further investigated subject to the detailed tree survey to be completed at the detailed design stage of the Project.

#### 4.3 Summary of Tree Impact

- 4.3.1 A summary of numbers of trees proposed to be retained or removed/transplanted are provided in **Table 2** below.

**Table 2** Summary of Impact to Existing Trees

Scientific name of trees	Estimated Number of Trees surveyed	Estimated No. of trees to be preserved	Estimated No. of trees to be removed/transplanted
<i>Acacia confusa</i>	121	44	77
<i>Acacia mangium</i>	120	1	119
<i>Albizia lebbeck</i>	53	4	49
<i>Artocarpus heterophyllus</i> (syn. <i>Artocarpus macrocarpon</i> )	3	-	3
<i>Averrhoa carambola</i>	1	-	1
<i>Bauhinia purpurea</i>	19	7	12
<i>Bauhinia</i> sp.	1	-	1
<i>Bauhinia variegata</i>	12	1	11
<i>Bauhinia x blakeana</i>	113	21	92

Scientific name of trees	Estimated Number of Trees surveyed	Estimated No. of trees to be preserved	Estimated No. of trees to be removed/transplanted
<i>Bombax ceiba</i>	7	1	6
<i>Brachychiton acerifolius</i>	25	22	3
<i>Broussonetia papyrifera</i>	64	19	45
<i>Carica papaya</i>	2	1	1
<i>Caryota maxima</i> (syn. <i>Caryota ochlandra</i> )	2	-	2
<i>Caryota mitis</i>	1	1	-
<i>Casuarina equisetifolia</i>	11	1	10
<i>Celtis sinensis</i>	38	10	28
<i>Chorisia speciosa</i>	1	1	-
<i>Chukrasia tabularis</i>	2	2	-
<i>Cinnamomum burmannii</i>	12	-	12
<i>Cinnamomum camphora</i>	7	3	4
<i>Cinnamomum parthenoxylon</i>	7	2	5
<i>Clausena lansium</i>	4	-	4
<i>Crateva trifoliata</i>	2	-	2
<i>Delonix regia</i>	7	7	-
<i>Dimocarpus longan</i>	33	-	33
<i>Dypsis lutescens</i>	1	-	1
<i>Eriobotrya japonica</i>	1	-	1
<i>Eucalyptus citriodora</i>	7	3	4
<i>Eucalyptus robusta</i>	2	-	2

Scientific name of trees	Estimated Number of Trees surveyed	Estimated No. of trees to be preserved	Estimated No. of trees to be removed/transplanted
<i>Fagus sylvatica</i>	1	-	1
<i>Ficus benjamina</i>	12	2	10
<i>Ficus hispida</i>	18	12	6
<i>Ficus macrocarpa</i>	24	5 (Including TPI-27)	19 (Including TPI-24 and TPI-25)
<i>Ficus religiosa</i>	2	-	2
<i>Ficus variegata</i> (syn. <i>Ficus variegata</i> var. <i>chlorocarpa</i> )	2	1	1
<i>Hibiscus tiliaceus</i>	3	3	-
<i>Koelreuteria bipinnata</i>	1	1	-
<i>Koelreuteria formosana</i>	1	1	-
<i>Lagerstroemia speciosa</i>	116	66	50
<i>Leucaena leucocephala</i>	234	40	194
<i>Ligustrum sinense</i>	3	-	3
<i>Litchi chinensis</i>	3	-	3
<i>Litsea monopetala</i>	2	-	2
<i>Livistona chinensis</i>	4	3	1
<i>Lophostemon confertus</i>	6	2	4
<i>Macaranga tanarius</i> var. <i>tomentosa</i>	86	21	65
<i>Mangifera indica</i>	2	-	2
<i>Manilkara zapota</i>	1	1	-
<i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i>	25	13	12

Scientific name of trees	Estimated Number of Trees surveyed	Estimated No. of trees to be preserved	Estimated No. of trees to be removed/transplanted
<i>Melia azedarach</i>	9	4	5
<i>Morus alba</i>	5	-	5
<i>Murraya paniculata</i>	2	-	2
<i>Phyllanthus emblica</i>	1	-	1
<i>Sapium sebiferum</i>	1	-	1
<i>Schefflera actinophylla</i>	11	3	8
<i>Senna siamea (syn. Cassia siamea)</i>	137	56	81
<i>Spathodea campanulata</i>	4	1	3
<i>Syzygium cumini</i>	1	-	1
<i>Tamarindus indica</i>	3	2	1
<i>Terminalia catappa</i>	1	-	1
<i>Terminalia mantaly</i>	1	-	1
		Estimated no. of trees to be preserved: 388	Estimated no. of trees to be affected: 1013

## 5. COMPENSATORY PLANTING

- 5.1.1 Based on the preliminary tree survey, the Project will affect approximately 1,013 nos. of trees (including 2 nos. of TPIs). The exact number of trees requiring tree transplantation or removal will be determined upon completion of the detailed tree survey and will be presented in the Tree Survey Report and Tree Preservation and Removal Proposal (TPRP) to be prepared at the detailed design stage of the Project).
- 5.1.2 All trees proposed for removal shall be compensated through compensatory tree planting and/or greenery provisions. Tree compensation ratio of at least 1:1 in terms of tree numbers in accordance with the criteria set out in the DEVB TC(W) No.4/2020 should be followed as far as practicable. Tree compensation at a ratio less than 1:1 due to site/ design constraints shall be fully justified in the TPRP.

## 6. CONCLUSION

- 6.1.1 A preliminary tree survey and important tree survey were conducted during February and May 2023 respectively. Approximately 1,401 nos. existing trees within or immediately adjacent to the Project Site were surveyed. Dominant tree species include *Leucaena leucocephala*, *Senna siamea*, *Acacia confusa* and *Albizia lebbeck*. Most of the existing trees in or adjacent to the Site were in poor to average conditions.
- 6.1.2 A total of 27 nos. Trees of Particular Interest (TPIs) including one Old and Valuable Tree (OVT) were surveyed in the 500m Assessment Area of the Project.
- 6.1.3 Among the surveyed trees, approximately 1,031 nos. existing trees located within the proposed works footprint, including 2 nos. of TPIs (namely TPI-24 and TPI-25), will be affected by the Project. The affected two TPIs will be preserved as far as practicable, and if affected, transplanting will be considered subject to the detailed tree assessment. The feasibility of transplantation of any of the affected trees will be further investigated subject to the detailed individual tree survey to be completed at the detailed design stage of the Project.
- 6.1.4 Compensatory tree planting and/or landscape provisions shall be implemented to mitigate impacts from tree loss due to the Project. Implementation of compensatory planting scheme in terms of species, procurement sizes and locations will be subject to detailed design of the Project.
